Before

Retrofitted

50% SAVINGS
estimated over typical refurbishment costs¹

PLUS

up to 45% ENERGY SAVINGS
estimated over standard lighting²

The FT400 Retro-fit makes it simple and cost effective to upgrade your school's lighting, save energy and reduce your carbon footprint.

The FT400 Retro-fit modernises old fittings with today's technology

- Saves energy
- Reduces running costs
- Improves efficiency
- Provides flicker-free light
- Starts instantly
- Operates silently
- Attractive diffuser covers
- Reduces installation costs
- Eliminates need to redecorate ceiling
- Provides bright, clean light

FluorelLighting
Lighting for a brighter future

Fluorel Lighting is a leading supplier of innovative energy efficient lighting

Retro-fitting* protects school budgets and reduces costs.

**FT400
Series**

Fluorel's retrofit FT400 system is cost effective modern lighting and provides a brighter environment for students in which to learn.

New technology improves performance, reduces costs

Fluorel Lighting has been a major supplier of quality lighting to schools in your area for over 30 years.

Technology has brought many advances during this time, most notably the introduction of low energy T5 fluorescent lamps and electronic control gear which offer lower energy consumption, reduced running costs and much improved performance.

A costly replacement programme isn't required

New gear trays with T5 lamps, electronic control gear and new

diffuser covers fit onto the existing bodies. The FT400 Retro-fit system is simplicity itself - avoids damage to the ceiling and disruption to the school wiring. Kits are easily fitted and connected by qualified personnel in a fraction of the time and more importantly, cost, when compared to a complete replacement.

Performance and savings straight away

The benefits start from day one: Instant starting, clean bright covers and energy savings. Emergency lighting and dimmable controls are also options.

"A year down the line and our new lighting is still making the school look bright and beautiful."

Lynne Moore, School Business Manager, Larchfield Primary School, Maidenhead.

"It's all complete and looking 1,000 times better."

Ed Jones, Premises Manager, Beaumont School, St Albans.
